78TH LEAGUE ANNUAL MEETING
MAY 1-3, 2014
WATERFRONT PLACE HOTEL

For Success

What's on the horizon?

Credit unions are faced with many challenges. Be it increased regulations and competition, shrinking margins and member driven technology all of which have created a new playing field in the delivery of financial services. Likewise, credit unions are well positioned to serve people in need of financial services that are fairly priced and offer convenience. What kind of leadership skills and

strategies will be required to navigate through choppy waters and rough seas? A newer generation of potential members with new wants and expectations. An aging membership seeking calm waters with regard to their retirement years. In what direction will they turn? Where will the next generation of credit union leadership come from? Join us to discuss these and other hot topics.
